Chromosomal mutations result from changes in a single gene. Kinds of Mutations(pages 307-308) 3. Mutations that occur at a single point in the DNA sequence are mutations. 4. A mutation involving the insertion or deletion of a nucleotide is a(an) mutation. 5. Complete the compare-and-contrast table of types of chromosomal mutations. frameshift ...

Section 12-4 Mutations

C. the size of their genes. D. the molecular biology of their genes. 13.3 Mutations Lesson Objectives 18. Define mutations and describe the different types of mutations. 19. Describe the effects mutations can have on genes.20. Lesson Summary Types of Mutations Mutations are heritable changes in genetic information.

Chapter 13 packet - LinkedIn SlideShare

One type of gene mutation is a point mutation involving an insertion or deletion of one base where it doesn't belong. Genetic code is read 3 bases, or one codon, at a time and when this type of mutation occurs the whole reading frame is shifted. For this reason this type of mutation is also known as a frameshift mutation.
