If the feature is turned off or the fault is removed, the trouble code will be moved to the "previously active" list and the code will end with a "P". For example:

## Download File PDF Fault Codes On Dt466 Engine

when the work light is turned on and there is an open an active circuit fault code (611 14 11 1 A) will be logged. When the light is turned off the code will become previously active.
