#### PLOS ONE: accelerating the publication of peer-reviewed ...

Unlike many journals which attempt to use the peer review process to determine whether or not an article reaches the level of 'importance' required by a given journal, PLOS ONE uses peer review to determine whether a paper is technically rigorous and meets the scientific and ethical standard for inclusion in the published scientific record.

Providing insight into any deficiencies is important. Giving your overall opinion and general observations of the article is essential. Your comments should be courteous and constructive, and should not include any ad hominem remarks or personal details including your name (unless the journal you are invited to review for employs open peer review).

#### How to review - Elsevier
