Published by Verkhoshansky SSTM 2011 - Rome, Italy

There wasn't any special training that allowed them to lift heavy weights with relatively little mass; most of it simply has to do with how they're built. So, the primary goal of intermediate training is to get into the highest weight class possible, as fast as possible, while still being fairly lean (below 15% body fat for men, and below ...

The Complete Strength Training Guide • Stronger by Science

Using special strength exercises optimally in a well-designed training plan will create the most transfer (although this is a point for another article). In the end the goal is to increase performance. Therefore don't get so focused on special strength that you lose sight of this. Special strength is just another tool in the toolbox.
