Statistics and math are very different subjects, but you use a certain amount of mathematical tools to do statistical calculations. Sometimes you can understand the statistical idea but get bogged down in the formulas and calculations and end up getting the wrong answer.

Statistics - dummies

Sections 6.40–6.45 for guidelines on reporting statistics Do not repeat statistics in both the text and a table or figure. In tables and figures, report exact p values (e.g., $p = .015$), unless p is $< .001$ (instead write as " $< .001$ "). Put a space before and after a mathematical operator (e.g., minus, plus, greater than, less than).
